

Near=Red · Far=Green · linkDepthColor=1 · ZdA: coherent subfields (S0+S2) swap depth+color at tStart · ZdB: noise subfields (S1+S3) swap
Filled = coherent subfield · Open = noise subfield · Circle = Field A (always-on, CW) · Triangle = Field B (delayed, CCW) · Color = depth plane at that frame
Title box: Dot/Depth cueing (✓/✗) · Small box above translation window: translator Color/Dir/Depth at tStart · Gold = translator depth plane · Blue = translation window
