

DecoupledDots — Three cueing factors: raw performance (n=2051, all 4 sessions)
Row 1: cued vs uncued arm for each factor · Row 2: pairwise comparison of cued arms

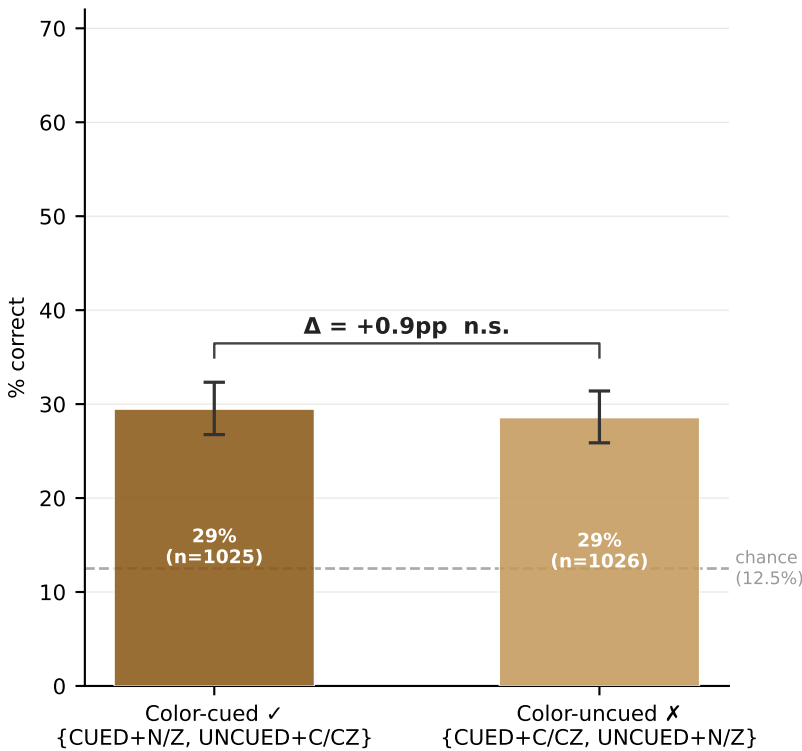

A. Dot cueing
(temporal onset marks translator)

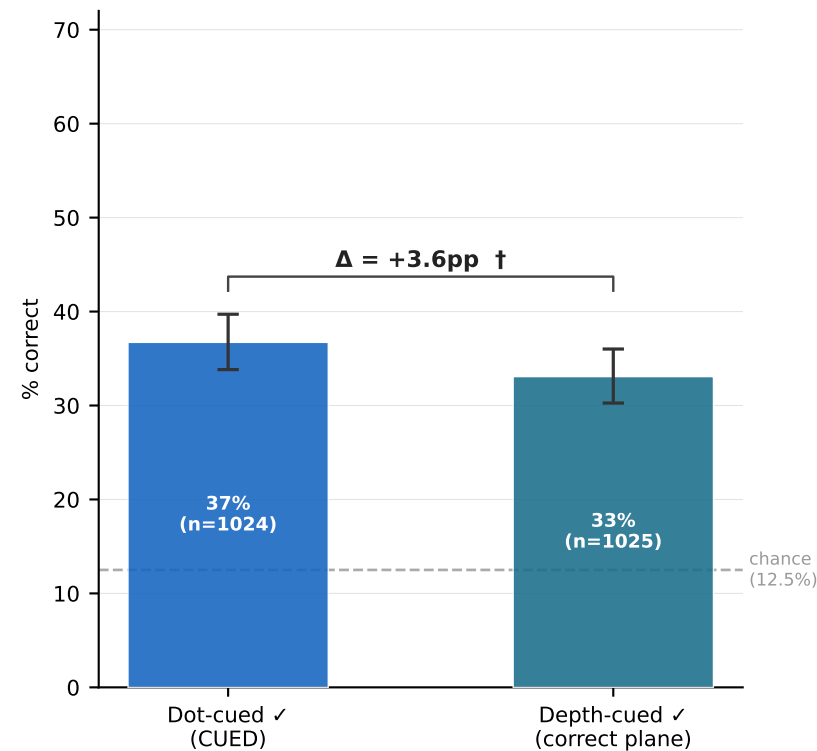

B. Depth-field cueing
(translator in same depth plane as delayed field)

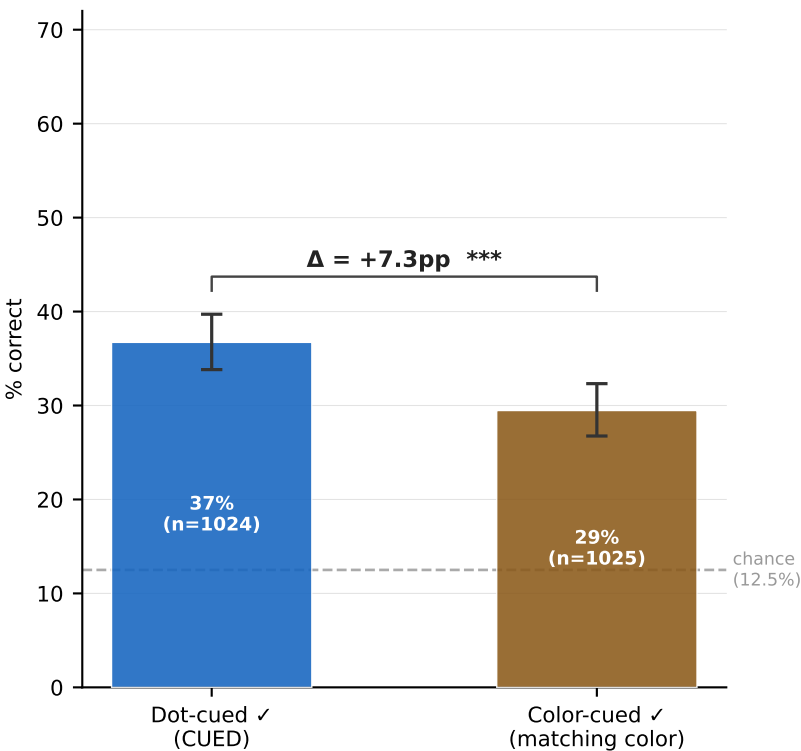

C. Color-field cueing
(translator color matches delayed field)

D. Dot-cued vs Depth-cued
(performance in the "favored" arm of each factor)

E. Dot-cued vs Color-cued

F. Depth-cued vs Color-cued
