

Feature trajectories — Continuous (top) vs NoContinuity (bottom)
Y = motion type · ■ early ● delayed ▲ replotted · Color = dot color · CUED vs UNCUED identical from TB onwards

CONTINUOUS

NO CONTINUITY

● Circle = delayed-onset field (onset cue)
■ Square = early-onset field
▲ Triangle = replotted dots (NoContinuity only) — new perceptual entity
Red — translating field (delayed in CUED; early in UNCUEd)
Green — non-translating field
--- wavy = non-coherent translation
--- spatial continuity maintained (continuous design only)
◇ MC swap: all fields reverse color + direction at tStart
